EDUCATION

Modern Education Society's Wadia Engineering College

Pune

B.E Computer Engineering

June 2025

- **CGPA** : 8.95
- **Related Coursework**: Data Structures & Algorithms, DBMS, Operating Systems, Machine Learning, Web Computing, Object-Oriented Programming, Statistics & Applications.

EXPERIENCE

Schbang

Parel, Mumbai

Full Stack Engineer (AI Full Stack Engineer)

Dec 2025 - Current

- Managed and maintained the **Schbang core website on Webflow**, including CMS architecture design, content structuring, performance updates, and scalable site enhancements.
- Designed and developed an **end-to-end CSAT automation platform** integrating WhatsApp APIs, Pabbly webhooks, and backend services with cycle-wise data persistence; deployed scalable architecture on AWS EC2.
- Implemented **real-time AI voice calling system** using WebRTC and VoIP integration (AiSensy), enabling live audio streaming, SDP session handling, and AI voice generation via ElevenLabs with optimized audio processing pipelines.
- Built and maintained **AI-driven meeting intelligence workflows (SecondBrain)** by integrating Recall AI for automated transcription, S3-based recording storage lifecycle management, and developing brand onboarding intelligence features generating brand DNA and summaries.

CometChat

Chembur, Mumbai

Trainee Engineer React JS

March 2025 - Dec 2025

- Designed and developed a WhatsApp-like chat application using **React.js** and **CometChat SDKs/UI Kits** to showcase platform features.
- Created **custom functionalities and workarounds** to address UIKit limitations, supported by detailed implementation documentation.
- Partnered with the **Solutions Engineering team** to customize demos and troubleshoot integration challenges for clients.
- Acquired strong hands-on expertise with **real-time chat SDKs, UI components, JavaScript frameworks**, and direct client collaboration.

PROJECTS

WhatsApp Clone using CometChat (Frontend)

- Developed a **real-time chat application** using **React.js** and **CometChat UIKit**, supporting **1:1 chats, group conversations, media sharing, and live user presence**.
- Customized and extended the UIKit with **tailored components and advanced SDK features** for enhanced functionality.
- Integrated **AI** to enable smart reply suggestions and implemented **FCM-based push notifications** for instant updates.
- Built a **scalable, modular, and responsive UI**, ensuring clean code practices and taking ownership of the **end-to-end development process**.

GitTogether (PolyRepo Microservice Architecture)

- **Built "GitTogether"**, a secure MERN-based platform where developers can **share blogs, connect with peers, and chat in real time**, featuring user profiles, friend lists, and conversations.
- **Engineered scalable APIs** with **cursor-based pagination, Socket.IO real-time messaging** (delivery/read status, active presence), and **Redis + Twilio OTP** for secure authentication and user activity tracking.

- **Developed a responsive React.js frontend** with modular components and led the **end-to-end development** of authentication, blogs, connections, and messaging features.

Britannia Campaign Engine (AI-Powered Branding Automation Platform)

- Built a **scalable RAG pipeline** with weekly scheduled scraping of product, text, and media data; stored structured product data in DB and embeddings in VoyageAI vector database.
- Designed **Brand DNA personalization engine** using template-driven prompt engineering with tone, platform, and style-specific content generation.
- Implemented **multi-model AI workflow** leveraging Gemini for content and image generation, ensuring contextual brand-aligned marketing outputs.
- Developed **automated asset pipeline** for campaign creatives with S3 storage integration, enabling consistent and scalable branding automation.

SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript (ES6+), Python, Java, React.js, Flutter, Node.js, Express.js
Databases & Tools: MongoDB, Redis, PostgreSQL, Prisma, Mongoose.
- **Core Concepts:** Real-time Communication (WebSockets), REST APIs, Pub/Sub Model, Modular Architecture,.
- **Machine Learning & Data Tools:** Scikit-learn, TensorFlow, OpenCV, NumPy, Pandas, NLP ,Jupyter Notebooks.
- **Practices & Methodologies:** Object-Oriented Programming (OOP), Agile Development, API Integration,
- **Dev Tools & Platforms:** VS Code, Git, Docker, Postman, Firebase (FCM), AWS (EC2, S3) , Google Cloud.
